

YAH Series Air Handling Units

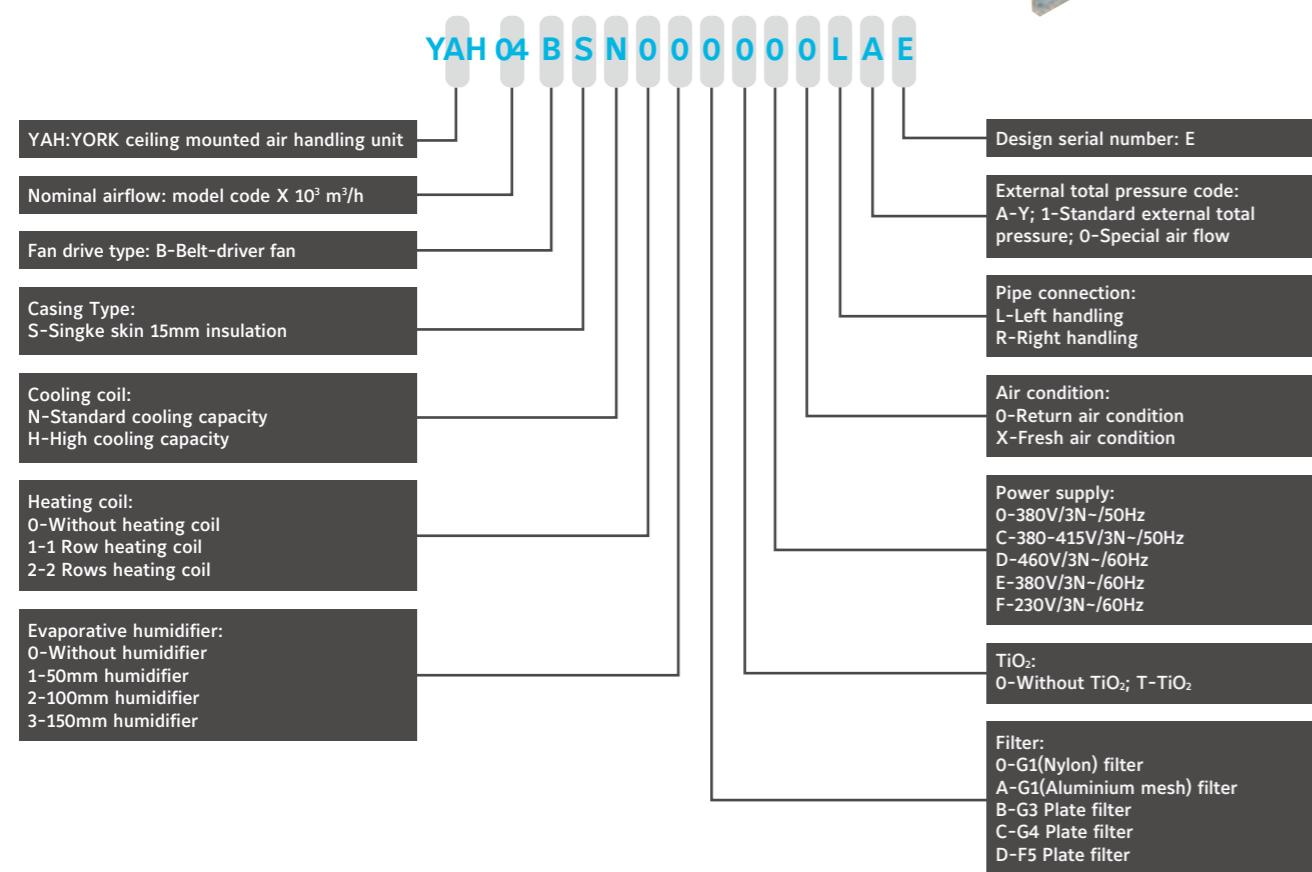

YAH Series Air Handling Units

Johnson Controls YORK® YAH ceiling mounted cabinet fan coil units are terminal points of central air-conditioning systems. They are designed for fresh air units or to cool, heat, humidify and de-humidify, filter and clean the air, etc. The conditioned air can be delivered to locations across various distances via specially designed ducts. The units are especially suitable for the air-conditioning of commercial buildings and industry applications.

YORK YAH series air handling units have 12 different models. The cooling capacity ranges from 8kW to 252kW, and air flow from 1500m³/h to 15000m³/h. Rated external total pressure ranges from 120 to 315 Pa. More external total pressure can be provided for flexible application.

Each unit is made from galvanized steel with 15mm thick polyester fiber insulation. It contains a built-in cooling coil and fan, and externally mounted nylon air filters.

Nomenclature & Feature

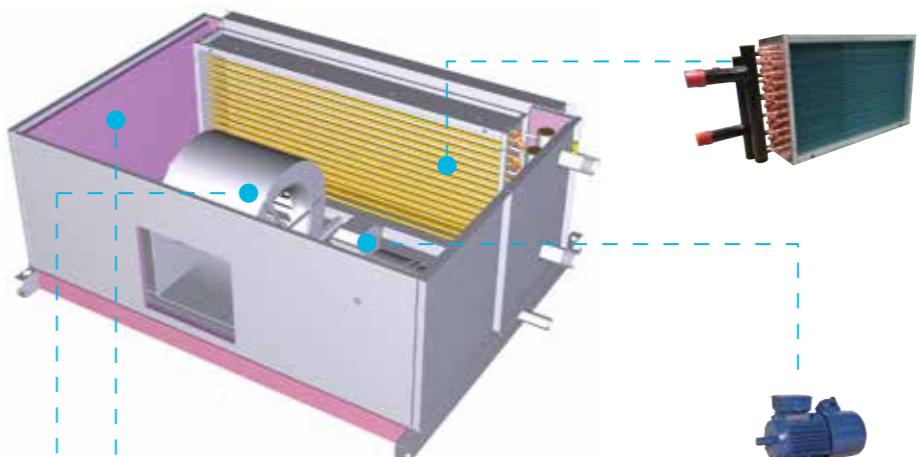

Cooling and heating coil use copper tubes with hydrophilic aluminium fins. The fan, motor and belt pulley are all high-quality products producing stable and efficient performance. The fan is a forward curved centrifugal model that works on double air inlets. The motor features IP55 and a type F insulation with self-lubricating bearings. The externally mounted filter can be withdrawn from side or bottom.

Features

- Easy installation
- Lower unit height for low head floor ceiling application
- Low noise
- Filter can be maintained from side or bottom

YAH Product Features

High Efficiency Heat Exchanger

- High quality copper tube and aluminium fin
- Better heat transfer efficiency

High Efficiency Motor

- Well-known brand motors
- IE3 motor efficiency
- Low operating cost
- VSD motor optional

Optimized Casing Structure

- Smooth surface, elegant profile
- Inner surface with aluminium foil surface, quality upgrade
- Ceiling-mounted design with firm and stable frame
- Steel bolts, nuts, screws with special treatment, enhanced corrosion resistance
- Galvanized steel with 15mm thick polyester fiber insulation

Quiet Operation

- High quality material: fan and motor
- Double inlet, forward curved blade centrifugal fan
- Less vibration
- Low noise motor with belt drive
- Each fan has been dynamically and statically balanced

High Performance Heat Insulation

- New polyester fiber insulation
- Good thermal insulation performance
- Non-combustible type, good fire resistance

Specifications

- Notes:
- The weight listed in the table is the shipping weight. The operation weight of unit is about 20% more than the shipping weight.
 - Standard return air cooling conditions: air inlet at 27°C DB/19.5WB; chilled water inlet/outlet at 7°C/12°C.
 - Standard return air heating conditions: air inlet at 21°C DB; hot water inlet/outlet at 60°C/50°C.
 - Cooling conditions of fresh air unit: air inlet at 35°C DB/28°C WB; chilled water inlet/outlet at 7°C/12°C.
 - Heating conditions of fresh air unit: air inlet at 7°C DB; hot water inlet/outlet at 60°C/50°C.
 - External total pressure: the sum of velocity pressure and static pressure at the air discharge outlet (exclude the pressure drop across the unit)
 - For four-piped unit, heating coil is in the front of the cooling coil in the direction of air flow.
 - If the unit has TiO₂, evaporative humidifier or split coil (cooling+heating) option, the external total pressure should be deducted by the responding air drop pressure
- The unit performance is based on 5m altitude, the variance of altitude will affect the unit performance

Altitude correction factors

Altitude(m)	300	900	1200	1500	1800
Total heat	0.99	0.97	0.96	0.94	0.93
Sensible heat	0.96	0.90	0.96	0.83	0.80

Note: The above is only for reference. Please contact our local office for detailed data.

YAH15B	15000	25	44	63	29	55	70	24	45	57	17	33	49

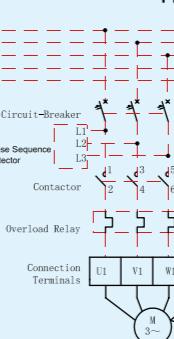

- Notes:
- The evaporative humidification is an isenthalpic process, which is only suitable for comfort air-conditioning, and not suitable for the applications where high precision of humidity control is required.
 - When the unit is equipped with a evaporative humidifier. The external static pressure of unit should be deducted by air pressure drop across the humidifier.
 - Fresh air humidification conditions: 28°C DB; 10% RH. Face velocity less than 3.0m/s.
 - Mixed air (fresh air ratio at 20-30%) humidification condition: 28°C DB; 25% RH. Face velocity less than 3.0m/s.
 - The above net weight includes the weight of evaporative humidifier, stainless steel frame and water distribution box; the operation weight of the evaporative humidifier is about 150% more than the unit.
 - The face velocity of direct feeding evaporative humidifier is the same as those of coils.

Electric Wiring Diagrams

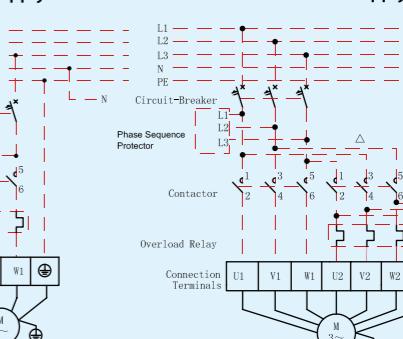

Electric Connection:

- The direct start schematic diagram (Fig.1) is for motor up to 5.5kW. The Y-△start schematic (Fig.2) for motors more than 7.5kW.
- The dashed lines is provided by customer and it should be connected according to Fig.1 or Fig.2. Please ensure that all connections are tightened.
- All electric connections should comply with local electric installation codes.
- The ground terminal of the unit must be connected to the ground terminal in the control panel.
- Customer should connect the power and control devices and supply short-circuit and over heat protection.

Power Supply

Power Supply

Factory Installed
Customer Supplied

Notes: for placing an order:

- The motor power is 380V/3N-50Hz, 380-415V/3N-/50Hz, 460V/3N-/60Hz, 380V/3N-/60Hz or 230V/3N-/60Hz, 4 wires.
- The unit is equipped with plate type pre-filters at the return air intake.
- When placing an order,

Notes:

- When G is "-", the unit has only one air supply duct connection.
- The coil pipe connections use male threads (thread code R2), the corresponding imperial diameters are:
34mm---1" 42mm---1-1/4" 48mm---1-1/2"
60mm---2" 76mm---2-1/2" 89mm---3"
- The condensate pipe connections use 34mm O.D. male threads (thread code R2).
- All dimensions are SI unit (mm).

Unit Drawings

Notes: The above applies to left hand unit.

Options

Industry Leading Technology - Nano-TiO₂ Healthy Air Sterilizer (Optional)

Johnson Controls is committed to providing comfortable and healthy living and working environment for all our customers. Whilst caring and safeguarding the natural environment outside. With indoor air quality becoming a crucial global health concern, our unique nano-TiO₂ healthy air sterilization technology can help remove almost all airborne germs and pathogens, ensuring healthy and fresh indoor air supply.

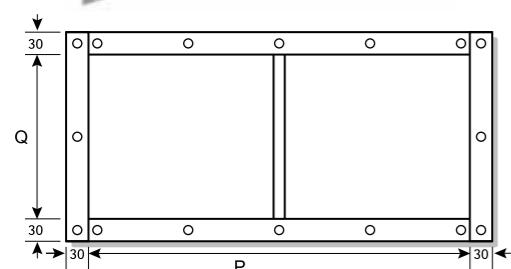

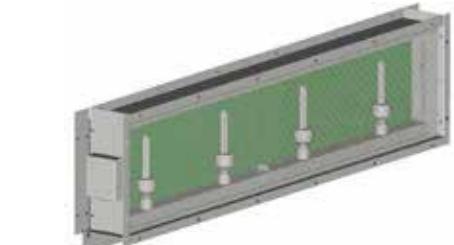

By oxidising and decomposing the harmful substances in the air, YORK Nano-TiO₂ healthy sterilization technology kills airborne germs, eliminates odors, and removes microbes and other harmful particles safely and efficiently.

- Biological pollutant - e.g. bacteria and germs
- Organic pollutant - volatile organic compounds (VOCs) e.g. formaldehyde, benzene
- Molds, fungi
- Inorganic gaseous pollutant - e.g. NOx, Sox
- Smoke and offensive odours

Nano-TiO₂ healthy air sterilization technology contains the following features:

- YORK is the first brand in the industry to apply Nano-grade TiO₂ technology to fan coils, residential and commercial central air conditioners, and residential split units.

TiO₂ Healthy Air Sterilizer 1

Model	TiO ₂ Model	Connection frame No.	Connection flange dimension		Lamp input power (W)
			P	Q	
YAH1F	TiO ₂ YAH1F	1	710	320	3 x 18
YAH02	TiO ₂ YAH02	1	795	320	3 x 18
YAH2F	TiO ₂ YAH2F	1	950	320	3 x 18
YAH03	TiO ₂ YAH03	1	980	371	4 x 18
YAH04	TiO ₂ YAH04	1	1120	411	4 x 18
YAH05	TiO ₂ YAH05	1	1260	460	4 x 18
YAH06	TiO ₂ YAH06	1	1460	460	6 x 18
YAH07	TiO ₂ YAH07	1	1700	460	6 x 18
YAH08	TiO ₂ YAH08	1	1910	460	9 x 18
YAH10	TiO ₂ YAH10	1	1710	639	12 x 18
YAH12	TiO ₂ YAH12	1	2010	639	12 x 18
YAH15	TiO ₂ YAH15	1	2485	639	18 x 18

Notes:

1. Power of ultraviolet lamp is 220V ~/50Hz or 220V ~/60Hz. Do not stare at the ultraviolet lamp for long time to prevent eye injury.
2. The relevant wiring of interlock control between sterilizer and YAH unit should be supplied by customer, i.e. the sterilizer starts when the indoor fan is turned on; and the sterilizer stops when the indoor fan is turned off.

Cooling/Heating Capacity Table

Notes:

1. Standard return air heating conditions: air inlet at 21°CDB; hot water inlet/outlet at 60°C/50°C.

2. Heating conditions of fresh air unit: air inlet at 7°C DB; hot water inlet/outlet at 60°C/50°C.

3. For four-piped unit, heating coil is in the front of the cooling coil in the direction of air flow.
